

# OLYMPIA HAND EDGERS

## STANDARD OLYMPIA EDGER FEATURES

- Handle Mounted Electric Start
- Engine Brake Safety Handle
- Handle Mounted Throttle Control
- Adjustable Cut Depth Control Lever
- Engine Mounted Independent of Base
- Internal Ice Shaving Direction Shield
- Preset Cutting Angle
- Alternator & Backup Battery Charger
- 4 Carbide tipped blades
- 4-cycle 3600 RPM engine

## OLYMPIA EDGER PROPANE POWERED

Width	16"
Length	41"
Height	37"
Depth of Cut	0" to 1/2"
Width of Cut	14" (12 7/8" min.)
Propane tank	5 lb.
Weight	111 lb.

## OLYMPIA EDGER CNG POWERED

Width	16"
Length	41"
Height	37"
Depth of Cut	0" to 1/2"
Width of Cut	14" (12 7/8" min.)
CNG tank	8.5 litre
Weight	150 lb.

## OLYMPIA EDGER GAS POWERED

Width	16"
Length	41"
Height	37"
Depth of Cut	0" to 1/2"
Width of Cut	14" (12 7/8" min.)
Tank	1 litre
Weight	106 lb.

Carbide Tipped Blades

Ease of use, safety, durability and efficiency are standard features in the Olympia line of hand controlled edgers. Featuring the latest innovations in design the Olympia Edger line sets a new standard for the industry. From the centralized controls in the handle to the proven reliability of its engine and cutting mechanism Olympia Hand Edgers meet all your ice edging needs

OLYMPIA MILLENNIUM  
The New Standard

# OLYMPIA HYDRAULIC EDGER

The Olympia Hydraulic Edger, the world's first fully functional hydraulic powered ice surface edger, provides the maximum in efficiency and safety.

Mounted on the back of the ice conditioner the hydraulic edger provides a precise, level cut.

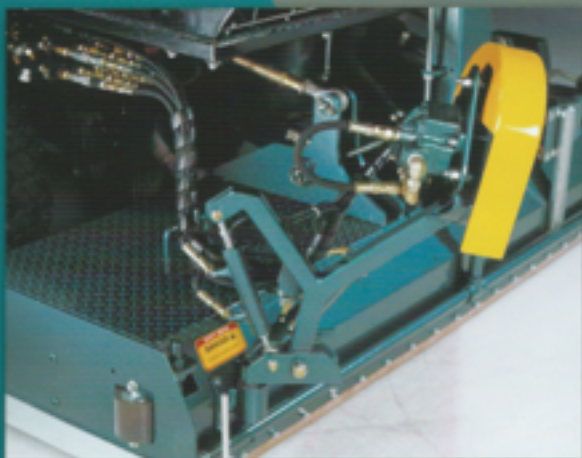

The operator, using a security key access system from the driver's position, controls the Olympia hydraulic edger. Once the safety shield is removed the edger is hydraulically lowered to the ice.

The hydraulic system provides constant down and side pressure, ensuring a clean, smooth cut, right up to the rink boards.

Both the cutting depth and cutting angle are both preset and adjustable.

A micro safety-switch on the edger automatically stops the blades when the edger is raised off the ice surface.

Designed to operate with the minimum of effort, and the maximum of efficiency, the Olympia Hydraulic Edger can be retrofitted onto all existing Olympia ice resurfacers.

WHAT EVERY ICE RESURFACER SHOULD BE

## FEATURES :

- Safety Access Key
- Safety Shield
- Manually Controlled Retraction
- Micro Safety-switch
- Constant Hydraulic Down and Side Pressure
- Constant Blade Speed
- Preset & Adjustable Cutting Depth
- Preset & Adjustable Cutting Angle
- Cutting Width 12"
- Carbide tipped Blades

# OLYMPIA BATTERY EDGER

## OLYMPIA BATTERY EDGER FEATURES

- Pollution Free 9 h.p. Electric Motor
- Motor Brake Safety Handle
- Maintenance Free Lead Acid Gel-Filled Battery
- Handle Mounted Adjustable Cut Depth Control
- Motor Mounted Independent of Base
- Internal Ice Shaving Direction Shield
- Preset Cutting Angle
- 8 Carbide Tipped Blades
- Blade Change Kit

OLYMPIA MILLENNIUM  
The New Standard

## AIR QUALITY – ICE QUALITY YOU CAN HAVE BOTH WITH THE OLYMPIA BATTERY EDGER

With sealed lead acid gel-filled batteries, eight carbide tipped blades and blade level controls at your finger tips the OLYMPIA Battery Edger delivers the finest, pollution free finish in the industry. Powered by a 9 hp motor, the OLYMPIA Battery Edger is totally non-polluting, environmentally friendly and provides more than 40 minutes of high performance edging between charging.

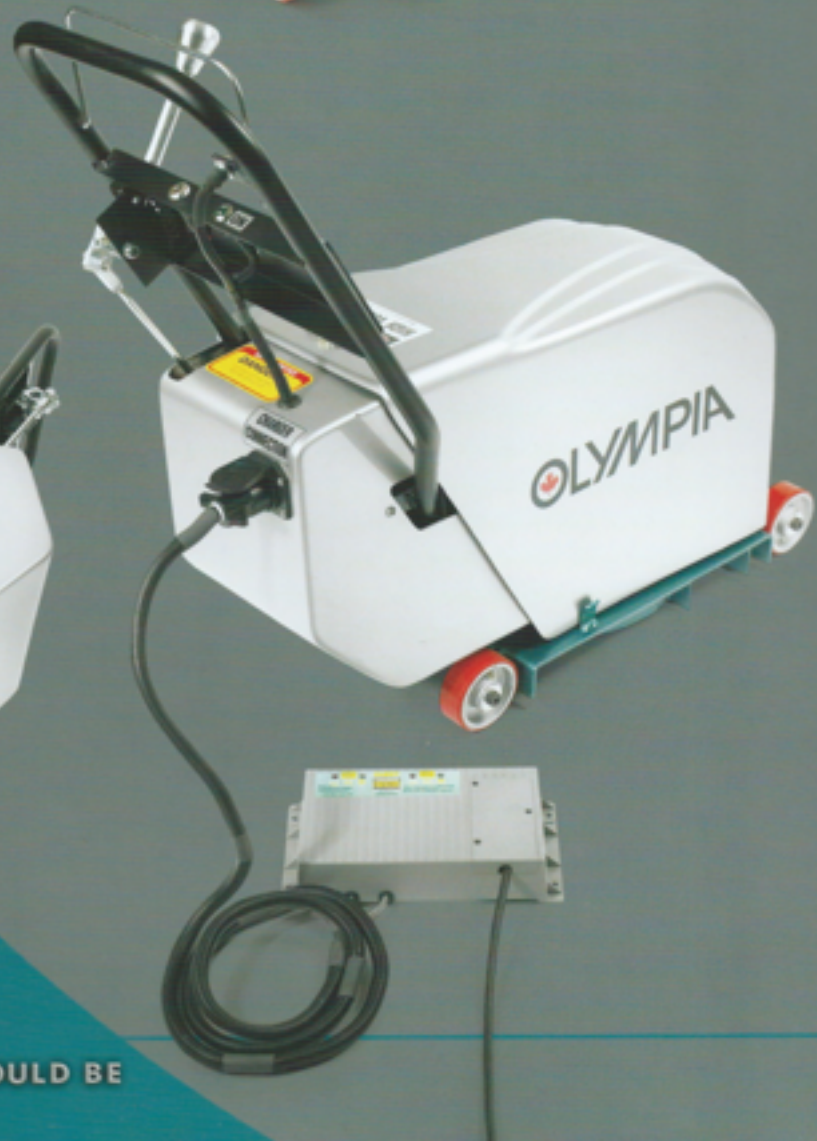

Ease of use and safety are hallmarks of all OLYMPIA products including the OLYMPIA Battery Edger. The blade level controls are at your fingers. The eight carbide-tipped blades provide the finest edging finish in the industry. Combined with the sealed lead acid gel-filled battery array and the custom removable blade holder and auto-set blade kit, the OLYMPIA Battery Edger ensures ease of maintenance and top performance.

Recharging is as simple as plugging the OLYMPIA Battery Edger into the Smart Charger system which automatically drains the battery of residual power and then recharges the battery to the maximum. This prevents the batteries from acquiring performance reducing memory. Once charged the OLYMPIA Battery Edger provides more than 40 minutes of high performance edging.

Changing the blades on the OLYMPIA Battery Edger is a simple matter of tilting the edger on its side. Removing the four bolts on the blade plate, setting the blade holder in the changer mount and unbolting the carbide tipped blades. The customized blade placement tool ensures the proper placement of the blades.

### SPECIFICATIONS

Width	16"
Length	41"
Height	37"
Depth of cut	0" to 1/2"
Width of cut	14" (12 7/8" min.)
Batteries (3)	Sealed Lead Acid Gel-Filled
Weight	250 lb.
Smart Charger and Cable	
Electric Motor	9 h.p.
